**Namirembe Road:
KAMPALA'S NEW LOOK!**

Namirembe Road: In 2019, Kampala Capital City Authority (KCCA), together with other development partners, commenced the construction of the Non motorized Transport Corridor, commonly known as "Oluguudo Iw'ababigere" literally meaning the road used by pedestrians.

This was under the former head of KCCA, Eng. Andrew Kitaka Mubiru. Many Ugandans especially those that use Namirembe Road were angry about the disruption caused by the construction of the above road. These included those from Kasubi, Nansana, Bakuli, Nateete, Kyengera, Busega, Wakiso among others. The road stretches from Bakuli traffic lights, crosses through Ham Shopping grounds, Galiraaya Plaza, Mutaasa Kafeero Plaza, Kizito Tower, diverging towards the newly constructed California plaza of tycoon Gaster Lule Ntake near Nakasero market upto Entebbe Road traffic lights.

The Numerable Road NMT corridor remains the first ever pedestrian street in Uganda and still among the first to be implemented in East Africa changing the face of urban Mobility in Kampala city. This has put Kampala on the Road map to embracing urban mobility and changing the face of transport in the city.

How has Namirembe Road transformed the City?

1. The route was designed to discourage through traffic from Bakuli to the Namirembe road and from Namirembe road to Luwum street.
2. The project allowed for land acquisition where necessary to expand and fit within the minimum specified standards of the walkways.
